

PRESS RELEASE

FKG Dentaire expands its obturation portfolio with new bioceramic products.

La Chaux-de-Fonds, Switzerland, March 2023.

FKG Dentaire has introduced BC Universal Sealer and BC Universal RRM to complement its endodontic obturation portfolio in the European Union, United Kingdom, and Israel.

FKG Dentaire strives to provide the best products to Endodontists and Dentists. From 2013, FKG has offered the best-in-class TotalFill® family of obturation products. TotalFill® provides superior clinical benefits thanks to its unique composition, and complete treatment range (cold obturation, warm obturation, tips, points, pellets, paste, putty, fast set putty). TotalFill® has been studied in more than 80 publications.

FKG Dentaire will continue its primary focus on TotalFill®. TotalFill® is the most important, complete, and best product in FKG obturation portfolio, and no change will be made to FKG TotalFill® offering. In the European Union, United Kingdom and Israel, the new BC Universal products will be offered in addition to TotalFill®, to support clinicians looking for clinical benefits at a more competitive price.

New bioceramic sealer: BC Universal Sealer

BC Universal Sealer is a premixed ready-to-use injectable calcium aluminosilicate paste developed as a permanent obturator for root canal treatment. It provides biocompatibility, antibacterial effects by high pH > 12 sustained over 7 days, bioactivity by hydroxyapatite generation, excellent bonding to gutta-percha and dentin. **BC Universal Sealer** does not shrink during setting, demonstrates excellent root canal sealing capacity, and is radiopaque.

New bioceramic RRM: BC Universal RRM

BC Universal RRM is a ready-to-use, capsule premixed calcium aluminosilicate paste developed for pulp capping, repair of root canal perforation or resorption, root-end filling, apexification. It provides high biocompatibility, antibacterial effects by alkaline pH, appropriate setting time for application, low solubility, superior dislodgement resistance due to excellent bonding to dentin, superior compressive strength, high stability, radiopacity and color stability.

With this launch, FKG now offers a more complete obturation portfolio to support practitioners in their treatment objectives. TotalFill®, FKG best obturation product, provides excellent clinical benefits and complete synergistic treatment range. In selected countries, and in addition to TotalFill® portfolio, BC Universal brings clinical benefits at a more competitive price.
